Raymond Bieber graduated from the University of Toledo with a Bachelor of Fine Arts major with a concentration on New Media Design Practices and a minor in Art History. He graduated from Whiteford High School in Ottawa Lake Michigan. He discovered his passion for photography and design while on the high school yearbook team. He has experience with photography and page layout. He has worked with Photoshop, Illustrator, Dreamweaver, InDesign and After Effects. He has collaborated with his colleagues to develop murals and posters for the Toledo Museum of Art and its library and the University of Toledo engineering building. He is now an Art Teacher at Skyway Career Prep High School.

Beluska Graphics Inc.

I used Illustrator to break apart to original design to fit it for the 8 1/2 x 11 format. I also included the dashed lines to show how the pieces go together. I then placed the numbers for the parts list. This was challenging because the numbers could not change size while the drawing was now smaller.

Freelance Design

I designed this flyer for a local artist. She supplied the pictures and text. I made an earlier rendition to discuss with her before making this final version entirely in InDesign.

Toledo Museum of Art Collaboration

I collaborated with my colleagues on this design for the poster for an exhibition at the Toledo Museum of Art. I was in charge of this version to be posted on Facebook

Adams Street Publishing

These are advertisements that I designed for Adams Street Publishing. They were made in InDesign while some images are edited in Photoshop. I have designed advertisements meant for digital and for print.

Toledo Journal

These are pages that I designed for the Toledo Journal. I edited the images in Photoshop and laid out the pages in InDesign. I worked with the editor to make revisions as needed.

Mecca Temple 43 gives away 27 bikes during Shrine Day

The Nobles of Mecca Temple 43 stand behind the winners of the bikes during their annual Shrine Day.

BY JURRY TAALIB-DEEN
Journal Staff Writer

During their annual Shrine contributions to the community.

There was a bouncy house children would be given a raffle ticket, and then they would simply stand behind the bike they wanted. A number would be read off, and the winner simply takes home a bike, compliments of Mecca Temple 43.

"I'm glad we're able to do this for the children," he said. "I really want to thank our patrons who helped us get the bikes," Mr. Ramsey said.

Mike Stanton, Past Potentate, explained, "As an association, we've been doing this since the early 1900s. It's just a part of our organization to give back to the community."

DeShawn Johnson Sr. said that he was fortunate that his three children each won a bike.

"This is perfect. I was about to buy my kids bikes, then I found about this event. I can be costly having to buy bikes for three kids that are why I really appreciate what this organization did today." In addition to their annual bike giveaway, during Shrine Day, Mecca Temple 43 also sponsors free haircuts, works with Martin Luther King Academy for Boys, donates to the Mid-

What We Can Learn from Schools that Educate Military Children

by NNPA ESSA | Jul 29, 2019 | #NNPANewswire, commentary, Education, ESSA, Every Student Succeeds Act, Every Student Succeeds Act (ESSA), Featured, Featured, K-12 Public Schools, K12 Education, NNPA, NNPA Newswire, nnpaESSA, Virginia | 0 comments

Dr. Elizabeth Primas, NNPA ESSA Awareness Campaign Program Manager

It is not uncommon for military programs to be adopted for use in civilian life. Schools in Virginia Beach, VA, that have some of the highest percentages of military children in the country, are doing an incredible job helping those students cope with the added stresses of having parents in the military. Other schools and communities can learn from Virginia Beach City Public Schools.

I recently spent a day with families and students from Shelton Park Elementary School. About 70 percent of the students there were

PHOTO CREDIT / SUBMITTED
Dr. Elizabeth Primas

children with a parent in the military or a defense contractor. There is a large population of special forces personnel in Virginia

Beach and at any moment, a parent can be called on for deployment to a warzone. Their families often do not know to where they are deployed, which compounds stress and anxiety.

A unique program in Virginia Beach public schools

includes 28 Military Family Life Counselors, who work closely with schools' staff and families to support students. One mother we

spoke with, talked about the fears her five-year-old daughter had while her father was deployed. After a particularly bad night, the mother let the school staff and the assigned counselor know that her daughter was going through a very difficult time. However,

mom was able to send her daughter to school knowing that the school community would play an active role in engaging with her to

help her work through her fears. The Virginia Beach counselors, funded under a program by the U.S. Department of Defense, are licensed and specialize in child and youth behavioral issues.

It's not just supporting students through the stress

of having a parent deployed where Virginia Beach schools excel in supporting this population of students. A report from The Lexington Institute looks at how schools and districts with high percentages of military families are supporting students, who, on average, move every 2-3 years to far and distant places. Uprooting and moving so often is disruptive to a child's educational progress, and it can stall their academic achievement.

However, moving is not the only thing that can disrupt educational progress. Low teacher retention, frequent absenteeism, and unsafe school environments are all factors that can also inhibit academic progress.

The Every Student Succeeds Act, a federal education law, requires schools and districts to have a well-rounded curriculum. Too many schools have eliminated music, art, drama, and essential academic courses like social studies and science to give more instruction time

to reading and math. Math and reading are critical, but these other subjects enrich the learning experience and help make a well-rounded, whole human being.

From the very beginning, students at Shelton Park Elementary School are exposed to art, music, leadership strategies. The well-rounded curriculum combined with support from the military counselors creates a school environment that can – and should – be modeled across the country.

As a lifetime educator, I am inspired to see how Virginia Beach Public Schools are supporting military children. They are truly a model to be emulated by any school, because every kid—military or not-deserves this kind of high-quality support and instruction.

Dr. Elizabeth Primas is the ESSA Program Manager for the National Newspapers Publishers Association.

The Test Every Kid Needs Before Going Back to School

(StatePoint) Before schedules get too hectic, experts say that parents should prioritize a visit to the eye doctor this back-to-school season.

"An annual comprehensive eye exam is essential for optimal wellness, as well as ensuring your child reaches his or her full academic potential," says Dr. Jennifer Wademan, VSP network eye doctor.

The incidence of visual impairment in preschool children is expected to increase 26 percent over the next 45 years, affecting almost 220,000 children, according to a recent study by the USC Gayle and

Edward Roski Eye Institute. What's more, kids have more demand on their eyes and vision than ever before due to the increased use of digital devices.

To help ensure a smooth transition back-to-school, consider the following tips and insights:

• Get a Comprehensive Eye Exam

While 76 percent of parents said sight is the most important sense, only 50 percent take their kids for an annual eye exam, according to a recent survey conducted by YouGov and VSP Vision Care, with many parents under the incorrect impression that the vision screening

conducted by the school nurse or at the pediatrician's office is sufficient. Although many schools offer abbreviated vision screenings throughout

the year, they can miss up to 80 percent of vision problems, including serious conditions like amblyopia (lazy eye), which can lead to vision loss if not treated.

An annual comprehensive eye exam is the best way to detect vision problems, as well as other conditions related to the eyes that can affect overall health and

wellness.

"How a child's brain processes visual information is complex.

The Toledo Threat captures the title in 'Quest for the Best'
Smothering defense gives them 31pt win

PHOTO CREDIT / TOLEDO JOURNAL
Shareese Ulis dives on the floor to help cause a turnover.

Rachel Theriot, of the Threat, shakes off a defender, and ultimately dribbled her way to earning the game MVP.

The Toledo Threat earn their championship victory.

BY JURRY TAALIB-DEEN
Journal Staff Writer

Of the 30 teams in the Women's Basketball Development Association, the three best teams would play at Lourdes University, 6832 Convent Blvd, Sylvania, Ohio, Saturday, August 3, and Sunday, August 4. The Toledo Threat, The Atlanta Monarchs, and the Philadelphia Reign, were the best teams in the league.

Saturday night featured the number two team, Toledo Threat, with a record of 9-1, going against the Atlanta Monarchs, with a record of 7-1. The Threat would prevail in high scoring, overtime victory of 95-88.

The very next day, with little rest, the Threat would face the number ranked Philadelphia Reign, who came in with an unblemished record of 10-0.

The first quarter would belong to the reign who, seemed to do everything correctly; from scoring, to defense, to rebounds, everything favored the Reign.

The Threat would find themselves down

to the lead heading into the second quarter, with a score of 21-16.

Within the opening minutes of the second quarter, Raven Ferguson would give the Threat their first lead, making it 22-21. Raven would become a force that the Reign would quickly get to know, and regret.

Leading the Threat at the point guard position was their floor general, Rachel Theriot, who would ultimately earn MVP of the game.

Rachel would push the ball up court, dishing out assists, and launching three pointers throughout the game. She and her teammates showed they mastered the lost art of following their shots, and when those shots didn't go in, they would crash the boards and lay the ball back up.

Helping to lead the charge of the Threats, stifling defense, was Shareese Ulis. What once was a confident Philadelphia team, turned into an indecisive club, who began to crumble under the pressure of the defense.

Forty-six, to 43, 55-47, 61-54, 76-54, 86-56,

nonexistent as the Threat cruised to a 104-71 victory.

"This victory feels really good," Coach McKey told The Toledo Journal. "In order for us to turn the first quarter around, we had to apply a full court press, and aggressive man, to man defense; both of which

helped us prevail."

"We were a little tired from yesterday's game, but the substitutions, with fresh legs helped us out a lot," said Raven.

Rachel Theriot, the MVP of the game, said, "It feels good winning this championship. As far as the MVP, although I was

establishment, three years ago, the championship game would be her last.

"I'm 30 years old, and it's time for me to retire. I've love being a part of this organization, and it feels good to win this championship," she said.

Imagine Madison Avenue School of the Arts Named 2019 Ohio School of Character

For over 20 years, Character.org has evaluated and certified character initiatives in schools through National and State Schools of Character. In a rigorous application and review process, schools must demonstrate successful implementation of all 11 Principles for the entire school community.

VIENNA, VA, June 27, 2019 – Imagine

Schools, a national non-profit network of public charter schools, announced its campus, Imagine Madison Avenue School of the Arts in Toledo, Ohio, has been named a 2019 Ohio School of Character by Character.org.

Schools that apply for recognition as a State School of Character benefit from self-assessment as well as the expert feedback

they receive through the evaluation. The process of applying, receiving feedback, and technical assistance creates a path for excellence for participating schools.

"This designation as a State School of Character reflects a schoolwide commitment to helping students become excellent learners and leaders," states Principal Lindsey Day. "We are honored by this recognition."

Janevia Washington, a parent at Imagine Madison, states, "The teachers are involved and really care about the students, not just while they are enrolled in their class, but even after they move on to the next grade level."

Imagine Madison is a tuition-free community school located in Toledo, Ohio, serving K-5 students.

Great Reading Ideas to Inspire Young Students

(StatePoint) A new school year means new classes, new teachers and new schedules. At home, you can riff on this theme with new books to be enjoyed outside the classroom, that spark interest in different subjects. To open doors for young minds, consider the following titles:

• Crafty coding: For kids with a potential interest in computers and coding, consider "How to Be a Coder." Breaking down the principles of coding into bite-sized chunks, it will get them thinking

like computer scientists in no time. Learn about loops by making a friendship bracelet, find out about programming by planning a scavenger hunt, and discover how functions work with paper fortune tellers. Children open their box for new knowledge to code by following instructions to build programs in Scratch 3.0.

• Inspiring true stories: In "DK Life Stories: Jane Goodall" kids can discover the inspiring story of Jane Goodall, a pioneer of primatology

whose groundbreaking work changed the way

we understand animals and ourselves. When she embarked on her career, women were discouraged from conducting scientific research, especially when that work meant living side by side with wild animals. A self-taught scientist, Goodall bravely ventured into the bush of Tanzania to discover the secret world of chimpanzees. This new biography series for kids from DK goes beyond basic facts to tell true-life stories of history's most interesting people.

• Edible science: Cooking is chemistry, and all 20 science experiments inside "Science You Can Eat," are edible and fun. Young minds can find out why popcorn go "pop," explore how taste is affected by smell, then discover the secret to making the perfect cookie. Examining interesting ingredients and exciting eating, as well as peeking into the

future of food, kids will get a better understanding of what's happening with food and why.

• A global celebration: Young readers of "Celebrations Around the World" will embark on an exciting journey through the most interesting and important festivals, celebrations and holidays enjoyed by people all over the globe. From why skeletons dance at the Day of the Dead in Mexico to how the world's biggest tomato fight – La Tomatina in Spain – gets cleaned up, stunning original illustrations and fascinating facts will inspire and inform children about cultures and religions from all over the world.

• Medieval mania: Spark an interest in history and architecture with "DK findout! Castles," which includes lots to learn about medieval castles, including knights, jousting, sieges, drawbridges and forts. Kids can learn about castle design, from the earliest motte and bailey styles to stone fortresses and beautiful castles in Japan and India, as well as view some of the most impressive castles in the world. Packed with information and color, this book is part of a series introducing children to a range of topics in a fun, engaging way.

After school is the perfect time to explore topics of interest, and a treasure trove of books can make learning new things fun.
